

# Blumberg, Baruch S.

## Baruch S. "Barry" Blumberg (1925–2011)

Baruch Blumberg, M.D., is best known for his discovery of the hepatitis B virus, sharing the 1976 Nobel Prize in Physiology or Medicine for "discoveries concerning new mechanisms for the origin and dissemination of infectious diseases." Dr. Blumberg ultimately created a vaccine against hep B that would save millions of lives. He worked at the NIH from 1957 to 1964 and then left to lead the Fox Chase Cancer Center in Philadelphia, all the while remaining very close to his NIH colleagues. In what could be described as a second career, he became the founding director of NASA's Astrobiology Institute. Dr. Blumberg was elected to the National Academy of Science in 1975 and received the Canada Gairdner Award that same year.

The Office of NIH History and Stetten Museum has gathered the following growing list of resources concerning Dr. Blumberg:

Baruch Blumberg Nobel Foundation

## Resources

### Dr. Blumberg's Own Reflections

- [Interview for "Web of Stories," 2009 \(videos\)](#)
- [History of NASA Astrobiology Institute in Astrobiology, 2004](#)
- [Astrobiology context in The Anatomical Record, 2002 \(PDF, 38 kB\)](#)
- [Interview about Hepatitis B for Lancet Infectious Diseases, 2002 \(PDF, 749 kB\)](#)
- [Scientific memoir in Journal of Gastroenterology and Hepatology, 2002](#)
- [Essay of ethics in science in Biomedicine and Pharmacotherapy, 1993 \(PDF, 255 kB\)](#)
- [Autobiography for Nobel Prize, 1976 \(PDF, 2.1 mB\)](#)
- [Banquet speech for Nobel Prize, 1976 \(PDF, 204 kB\)](#)

### Journal Publications

- [Biography by Carl B. Pilcher in Astrobiology, 2015](#)
- [Biography by Marc A. Shampo and Robert A. Kyle in Mayo Clinic Proceedings, 2003 \(PDF, 32 kB\)](#)

### Non-journal Publications

- [Blog post, Insights: Scholarly Work at the John W. Kluge Center, 2015 \(PDF, 112 kB\)](#)
